Krishna Somani

kr7shnasomani@gmail.com LinkedIn GitHub Portfolio Chennai, India

Summary

Applied AI Engineer experienced in architecting end-to-end agentic workflows & multi-agent systems. Proven track record of shipping enterprise AI agents & high-scale conversational platforms with low latency, high accuracy & optimized inference costs.

Education

SRM Institute of Science and Technology, Kattankulathur, India *Aug 2023 – May 2027*
Bachelor of Technology in Computer Science and Engineering

Experience

Rocketlane *Chennai, India*
Forward Deployed Engineer Intern *August 2026 – Present*

- Deployed 7 production AI agents on Nitro across 10+ enterprise accounts & PoC conversions, automating 80+ page SOWs (∼1 min), project setups (∼2 min vs. 2-3 week handoffs) & 313-item requirements docs (80% vs. 56% accuracy).
- Engineered a custom app (∼60 country projects under a 20s limit) & rebuilt a reporting agent (30-40 min to 2-3 min runtime) for Nitro's 2 largest customers, cutting LLM run costs 60-65% via deterministic Python pipelines.

PharmEasy *Bengaluru, India*
Data Scientist Intern *June 2025 – Nov 2025*

- Architected and deployed two AI-powered WhatsApp chatbots using Dify with agentic workflows, LLM function calling, and RAG, reducing upkeep effort by 70%.
- Enabled users to search and browse 100,000+ healthcare products and 500+ diagnostic tests & packages, view detailed information, upload prescription, manage cart, select or add delivery address, choose appointment slot, and complete orders or bookings in a unified flow.

Projects

Kairos | GitHub

- Developed a multimodal industrial intelligence platform ingesting P&ID schematics, degraded scans, handwritten logs, and voice notes into a temporal knowledge graph via quality-gated OCR, vision parsing, NER, and entity alias resolution.
- Implemented a governed Graph-RAG and proactive briefing engine combining hybrid vector-graph retrieval, dual-track contradiction resolution, confidence-gated human review, and adaptive circuit breakers for grounded decision support.

Skills

Languages	Python, C++ and SQL
Libraries	FastAPI, LangChain, PyTorch, TensorFlow, scikit-learn, OpenCV, pandas, NumPy, Selenium
Tools	Neo4j, Qdrant, Redis, Supabase, Dify, n8n, Docker, Git, GitHub, Postman, AWS
Core Competencies	RAG, Knowledge Graphs, LLMs, NLP, Deep Learning, Computer Vision, Multi-Agent Systems

Achievements

- **Winner, Tem-E-thon 2025** – National-level hackathon by Temenos & Anna University; awarded MacBook Air M3 15".
- **Top 9, FinShield 2025 Hackathon** – Initiative by Govt. of India, IBA and GFF, hosted by BoI, IITH & IDRBT.
- **Runner-Up, Impact-AI-Thon 2026 Hackathon** – Organized by St. Joseph's College of Engineering; won ₹30,000.
- **Top 12, DEVTrails University Hackathon 2026** – Organized by Guidewire and EY with 4,400+ teams participating.
- **Winner, Srijan 2026** – National-level hackathon organized by Atos; won cash prize & goodies.
- **Top 28, ET AI Hackathon 2.0** – Organized by Economic Times, Octave and Posspole with 15,000+ teams participating.

Additional

- Created a Chrome extension automating SRM feedback form, reducing completion time by 96% and serving 2,000+ users.
- Shipped a zero-dependency browser extension that tracks LLM token usage, prompt-cache windows and rate limits in claude.ai chats; adopted by 11,000+ users.
- Co-authored "A Deep Learning-Based Framework for Blood Group Prediction Using Fingerprint Image Patterns", IEEE ICNPCV 2026, Bangalore.
